

The diagram illustrates a teleconferencing system architecture. A central cloud labeled "Internet" (19) connects various participants. On the left, a "Presenter in Pittsburgh" (10) is shown with a computer monitor (22) and a telephone (25). Below the presenter is a "Voice over IP" device (26). On the right, an "Attendee in San Francisco" (13) is shown with a computer monitor (13) and a telephone (25). Below the attendee is a "Telephone" (25). In the bottom right, "Off-shore attendees" (16) are shown with a computer monitor (16) and a telephone (25). Below the off-shore attendees is a "Telephone" (25). At the bottom center, an "Optional text-based conferencing" device (28) is shown. The diagram is labeled with various numbers: 10, 13, 16, 19, 22, 25, 26, and 28.

**What is iMeet.com?**  
iMeet.com allows you to conduct live presentations on the Web, where the presenter controls what the audience sees!

**Who uses it?**  
Anyone who ever needed to be able to *show* information instead of describing it in words. Professionals, business people, road-warriors, Web site developers,... you!

**Why iMeet.com?**  
It's simple. It's affordable. And it works.

**When and Where?**  
*Anytime, Anywhere!* All you need is a browser and a Net connection.

**How do I get started?**  
Take a quick demo or sign up now!

**Sign-Up Now!!**

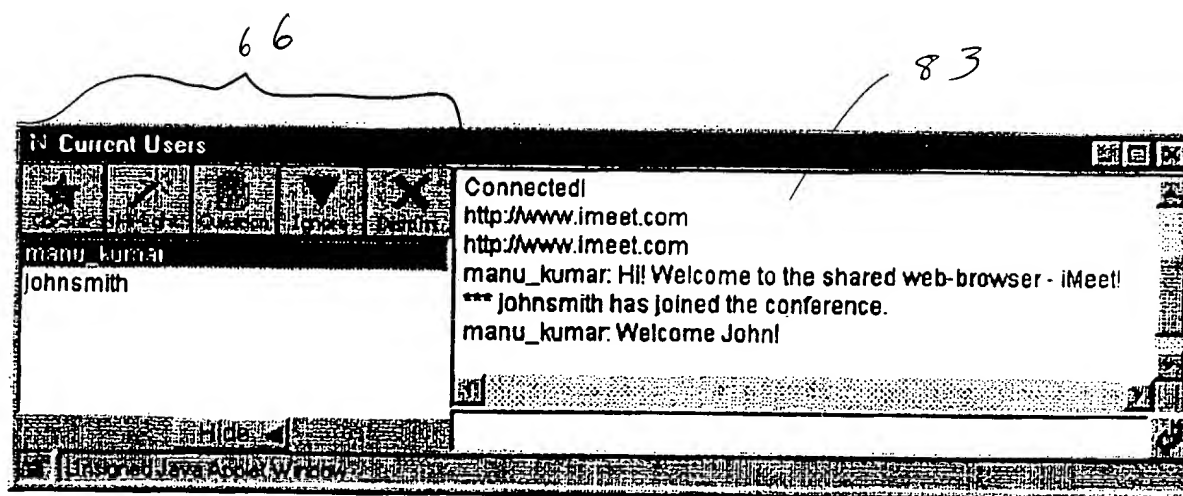

**Today @ iMeet.com**  
**FREE! FREE! FREE!**  
Yes! You may use all the services offered by iMeet.com during our beta period for FREE! And better yet, users that sign up during the free beta period will receive a 10% discount on all iMeet.com services for one month once we go live. Sign up today!!
